

# Siamak Faal

## Robotics EApplied Scientist

Highly motivated applied scientist with demonstrated success in developing and implementing technologies and solutions in robotics, mechatronics, control, and optimization. Expert at design and implementation of novel algorithms to variety of advanced robotic and mechatronic systems. Proficient in orchestrating teams to prototype, build, test, and maintain hardware and software solutions. Passionate about conducting comprehensive research in collaborative environments.

## Education

- Ph.D. in Robotics Engineering | Worcester Polytechnic Institute, MA, 2018
- Master of Science in Applied Mathematics | Worcester Polytechnic Institute, MA, 2019
- Master of Science in Mechatronics | Sharif University of Technology, Iran, 2012
- Bachelor of Science in Mechanical Engineering | Sharif University of Technology, Iran, 2009

## Areas of Expertise

- Optimization and Control
- Motion and Trajectory Planning and Optimization
- AI, Machine Learning and Deep Learning
- Robotic, Mechatronic and Automation
- Image Processing and Computer Vision
- PDE, ODE and Numerical Analysis
- Simulation and Modeling
- Systems Engineering

## Technical Proficiency

**Programming** C; C++; Python; MATLAB; JavaScript; GO; PHP; BASH; **Scientific Computing** MATLAB; SciPy; NumPy; CUDA; OpenCL; **Embedded Systems** RTOS; Embedded C; Embedded Python; Altium Designer; Proteus Design Suite; **Robotics** ROS2; Simscape Multibody; MuJoCo; Gazebo; **ML, DL and CV** TensorFlow; PyTorch; OpenCV (Python & C++); **MATLAB Computer Aided Design (CAD)** SolidWorks; AutoCAD; Creo; **Markup Language** TeX; LaTeX; HTML; CSS;

## **Professional Experience**

### **Applied Scientist, Kodama, CA, 2023**

Designing and implementing motion planning algorithms for autonomous forestry machinery. Creating models, performing simulations and data analysis, and providing optimized solutions for various tasks and assignments involved in forestry.

### **Robotic Applied Scientist, Amazon, WA, 2022**

Formulated and implemented solutions to problems in motion planning, optimal storage allocation and damage reduction for a robotic consolidation system to be utilized at fulfilment centers. - Reduced consolidation cycle time from 12.8 s to 1.8 s (~70% decrease in time; faster than 2 s original design criterion) by formulating, solving, and implementing an optimal control solution in less than 2 month of tenure.

### **Computational Scientist, Worcester Polytechnic Institute, MA, 2019 – 2022**

Managed a diverse team of engineers and artists on creating and integrating interactive learning experiences for various courses in ME, ECE, CS, MA and PH. Guided faculty and graduate students on the development of simulations and computational approaches to support institute's multifaceted research. - Developed a remote code editor and compiler with a full API support, embeddable in Canvas, to provide interactive examples for languages such as C++, HTML, LaTeX, Octave, and Python. - Initiated and supervised the development of asynchronous online software trainings and automated certifications.

### **Adjunct Professor, Worcester Polytechnic Institute, MA, 2019 – 2022**

Planned, organized, and delivered engaging graduate and undergraduate lectures on Control, Robotics, AI, Machine Learning, Differential Equations, Linear Algebra, and Calculus. Created supplementary materials and volunteered extra hours to support underperforming learners towards achieving desired grades. - Coordinated faculty to redesign course material, delivery methods and software applications used for the Calculus labs that led to %72 increase in student engagement and mastery of the subject (reflect through grades and reviews). - Customized course materials with engaging real-world examples to encourage project-based learning.

### **Postdoctoral Researcher, Department of Mathematical Sciences, Worcester Polytechnic Institute, MA, 2019**

Conducted research on numerical analysis of partial differential equations and convolution neural networks. Organized and involved in a study group composed

of faculty, post docs and students, with focus on the theory and practice of deep learning. - Formulated a stable and robust Newton's iterations to solve the finite element problem for Cahn-Hilliard Equations with a logarithmic nonlinear potential function. - Developed MATLAB and C++ applications to solve the finite element problem with BPX preconditioning.

## **Academic Research**

- Developed and implemented optimal BPX preconditioner for Cahn-Hilliard equations with logarithmic potential function.
- Studied the effect of input saturation in nonlinear closed-loop systems, and developed feedback-planning schemes to synthesize controller functions for nonlinear systems subjected to input limitations (Ph.D. thesis).
- Formulated and experimentally validated a decentralized method to achieve collective object manipulation with swarm robotic systems using custom designed and fabricated holonomic drive robots.
- Formulated Jacobian based controllers for underactuated systems, in particular, unmanned aerial vehicles.

## **Affiliations & Leadership**

- President: Lecture, A Multidisciplinary Learning & Teaching Organization, Worcester Polytechnic Institute, MA, 2015 – 2018
- Chair: Iranian Students Association, Worcester Polytechnic Institute, Worcester, MA, 2016 – 2017
- Director: Robotic Group, Sharif University of Technology, International campus, Kish, Iran, 2007 – 2012
- Director: Mechatronic Workshop, Sharif University of Technology, International campus, Kish, Iran, 2009

## **Academic & Community Activities**

### **Manuscript Peer Reviews**

- IEEE Conference – Automation Science & Engineering; International Symposium on Assembly & Manufacturing (CASE & ISAM)
- IEEE Conference – Technologies for Practical Robot Applications (TePRA)
- IEEE International Conference – Robotics and Automation (ICRA)
- IEEE Transactions – Mechatronics
- IEEE Transactions – Robotics
- Springer Intelligent Service – Robotics

### **Educational Outreach**

- Engineering Software (Frontiers II), Frontiers Summer STEM Residential Camp, Worcester Polytechnic Institute, MA, 2017/2018

- Mechanical Engineering (Frontiers I), Frontiers Summer STEM Residential Camp, Worcester Polytechnic Institute, MA, 2017

## Professional Development

### Certificates

- Individual Development Plan, Worcester Polytechnic Institute, MA, 2017
- Research Communication Series, Worcester Polytechnic Institute, MA, 2017 ### Courses
- Faculty Institute for Online Teaching, Worcester Polytechnic Institute, 2020
- Project management Online Course, University of Adelaide, edX.org, 2016
- Presenting Data & Information Course, Edward Tufte, Boston, MA, 2015

### Awards & Honors

- Best Conference Paper Award (ABB), 12th IEEE International Conference on Automation Science & Engineering (CASE), 2016
- Teaching Assistant of the Year Award, Worcester Polytechnic Institute, 2015
- Ranked 2nd among all Mechatronics M.S. Students, Sharif University of Technology, Class of 2012
- Ranked 2nd among all Mechatronics B.S. Students, Sharif University of Technology, Class of 2009
